何谓Running Head或Runing Title？有些SCI杂志在提交SCI论文的时候，要提供 Running Head，或Running Title，要么是在投稿系统里面填写，要么是在manuscript中添加。

什么是Running Head?

Running Head

可以翻译为**短标题**

。一般出现在稿件的左上或者上方。其主要作用是帮助读者掌握研究的主旨大意，同时帮助审稿者确认稿件。

如何填写Running Head?

短标题必须简短、明晰，扼要。好的短标题会给读者留下深刻印象。因为杂志对Running Head的字数有限制。一般来说包括空格在内不超过 50 个字符。因此在撰写Running Head的时候需要可以提炼文章主旨大意，如果文章题目本身就很短，可以直接使用文章题目。如果文章题目比较长，则需要对文章内容进行提炼，凝练出比文章题目更加短小精悍的句子。

下面看看APA如何定义Running Head：

APA Style: Running Head Format for APA Style Papers

---

## Formatting the Running Head

Open the header for your paper and type your title in all capital letters. Count the number of letters, spaces and punctuation. If that number exceeds 50, provide a shorter version of your title. For instance, "The *Breaking Bad* Effect: A Study of the Attraction of Illegal Activity to Upstanding Citizens" could be shortened to "THEBREAKING BAD EFFECT" (without the quotation marks) in the running head. Left-justify the title in the header across all pages of the manuscript. The running head on the title page should be preceded by the term "Running head" with no quotation marks, a colon, a space and then the title in all caps, like this example: Running head: THE *BREAKING BAD* EFFECT On every other page in the manuscript, the title should appear without a preceding "Running head," like so: THE *BREAKING BAD* EFFECT.
